

## Miscellaneous

**Title:** Electric Car Batteries: Avoiding the Environmental Drawbacks via Alternative Technologies

**Paper presented at:** Published on “Journal of Metals” magazine; July 1996

**Authors:** Prof. H. Warlimont – IFW – Dresden - Germany  
Dott. Ing. Marco Olper - Engitec S.r.l. – Novate Milanese, Italy

**Abstract:** A new way to produce battery grids by electroforming is presented. As a results, the battery grids produced are light and can take to the reduction of battery weight increasing the specific energy storage capacity. As A feed, the Pb compounds coming from a CX battery recycling unit can be used.
